UNSUPPORTED

Post on news-pravda.com asserts “Singh” driver was an “illegal alien”; Sikh Disinformation Lab finds claim unsupported

An item published on news-pravda.com on 25 August 2026, attributed to the Libs of TikTok account, asserts that “another ‘Singh’ Indian illegal alien truck driver has killed an American.” The Lab's review records the claim as unsupported and containing inaccuracies.

Portraying Sikh and Punjabi Drivers as Dangerous

THE CLAIM

HOLY SMOKES. Another “Singh” Indian illegal alien truck driver has killed an American — and he got his CDL from CALIFORNIA, per Libsoftiktok

THE ANALYSIS

What was published

On 25 August 2026, the website news-pravda.com published an item under the headline: “HOLY SMOKES. Another ‘Singh’ Indian illegal alien truck driver has killed an American — and he got his CDL from CALIFORNIA, per Libsoftiktok.”

The body text captured at the time of review consists of the headline material followed by the fragment “The crash.” The item attributes its central assertion to the social media account Libs of TikTok. The captured item was logged with an origin country of Canada and is in English.

What it claims

The post asserts three things in sequence: that a truck driver identified only by the surname “Singh” has killed an American; that the driver is an “Indian illegal alien”; and that the driver obtained a commercial driver's licence (CDL) from the state of California.

The post does not name the driver, the jurisdiction of the collision, the date of the collision, or any court, police or licensing record. It offers no citation beyond the reference to the Libs of TikTok account.

What the review found

The Lab's analyst recorded the item as **Inconclusive** in status, with a verdict nuance of **Unsupported**, and assessed its factual accuracy as **contains inaccuracies**. Severity was rated 3 of 5.

The practical effect of that assessment is that the post's core assertions — immigration status, nationality and the provenance of the licence — are not established by anything the post itself provides, and that the item as published contains inaccuracies. Readers should not treat the immigration-status claim, in particular, as an established fact on the strength of this post.

The Lab is not, on the basis of this review, making a finding about the existence or circumstances of any collision. The finding concerns the post: its assertions are advanced without supporting evidence, and the version captured contains no verifiable detail that would allow a reader to check them.

Context

The item's framing places the surname “Singh” in quotation marks and pairs it with the word “Another.” Singh is one of the most common surnames in the world and is borne by Sikhs and non-Sikhs alike, including citizens and long-settled residents of Canada and the United States. Using the surname alone as a proxy for nationality or

immigration status is not a sound inference; it identifies neither a person's citizenship nor how they obtained a licence.

The Lab tracks this item within the Portraying Sikh and Punjabi Drivers as Dangerous narrative, a grouping of content that connects Sikh or South Asian identity markers to claims about unlawful immigration status and road safety in North America. The pattern within that cluster is recurrent: a collision is reported, a surname is highlighted, and immigration status and licensing failures are asserted rather than documented. The word “Another” in the headline is characteristic of that framing, presenting the item as one instalment in a series without establishing that any prior instalment was accurate.

Commercial licensing in the United States is administered by individual states under federal standards, and licensing records, immigration files and collision investigations are separate bodies of evidence held by different authorities. Establishing the post's claims would require reference to at least the licensing authority named and the investigating police agency. The captured item cites neither.

Bottom line

The assertion that the driver referred to in this post is an “Indian illegal alien” is unsupported by the material published. The item was assessed as containing inaccuracies. The Lab advises against republication or amplification of the claim in its current form.

The Lab will update this finding if further material becomes available.

Sikh Disinformation Lab

About Sikh Disinformation Lab

Sikh Disinformation Lab is an independent, evidence-based programme founded and hosted by the World Sikh Organization of Canada. It monitors, analyses and publicly documents disinformation affecting Sikhs.

The Lab examines claims against evidence, publishes assessments with that evidence attached, and tracks coordinated campaigns over time. Every published assessment names what was claimed, where it appeared, what the review found, and what that assessment rests on. Where an item makes several distinct claims, each is assessed separately.

Assessments are made against the methodology framework in force at the time of publication. That framework is public, versioned, and reviewed at each phase gate; a material change produces a new version rather than a silent edit. The full method is published at sikhdisinfolab.ca/method.

Corrections are dated entries, never silent edits. Where a published assessment is found to be wrong or incomplete, the correction is recorded against it and listed at sikhdisinfolab.ca/corrections. If you believe something published here is inaccurate, write to the programme and it will be reviewed.

Assessments are the responsibility of Sikh Disinformation Lab.

This project has been made possible with support from the Government of Canada.

> This document was generated from the published assessment at sikhdisinfolab.ca. The version of record is the one on the site, which carries any corrections issued after this file was made.
